Materials Handling & Packaging Eng.  
Douglas Aircraft Company  
3855 Lakewood Blvd  
Long Beach, California 90846

Dear Mr. Veneroso:

Thank you for your letter of April 20th to us.

Concerning Hazardous Regulations on shipments of Alumibraze 400, it should be handled as follows:

When shipping via air, it is I.A.T.A., article number 78, Aluminum Metallic Powder, Flammable Solid N.O.S. It is covered under packaging note 404 and a Flammable Solid Label must be applied.

Under Department of Transportation regulations, Alumibraze 400 or Aluminum Metallic Powder do not appear on any hazardous material listings nor are they defined as a flammable solid. This means no flammable solid label is required for surface transportation.

The D.O.T. regulations clearly state that labels must not be applied to a package of unregulated material, since it is just as much a violation to over-label as it is to under-label.

If you should require any additional information, please let us know.

Sincerely,

HANDY & HARMAN
